

ARE YOU READY TO CONSIDER A NEW MODALITY THAT CAN BRING YOU NEW PATIENTS AND NEW REVENUE? IF SO, GET ON THE WAVE.

As the baby boomer generation ages, the demand for chiropractic services will climb. Now, with vibration exercise you can capitalize on a market that has a keen desire to stay mobile and fit. You're probably seeing this already in your own practice.

Bio-mechanical muscle stimulation (BMS) - vibration exercise - is the modality that not only builds muscle strength and enhances vitality, even for those with mobility challenges, it is safe and practical technology that will give your practice new revenue potential and open

doors to a welcome group of new patients. WAVE's vibration plate was developed by clinicians for clinicians and is the only one available today with patent pending self-calibration ensuring vibration consistency, even with a wide variety of patients, and that offers pure vertical vibration.

WAVE is leading the world in the development of an ethical approach to vibration technology that offers assured dosimetry. Call WAVE for details.

- PATIENT BENEFITS -

Vibration exercise activates more muscle fibres with less stress than any other exercise method. Benefits include minimal joint, ligament and tendon stress. Accelerated strength gains in a fraction of the time. Improved circulation. Reduced lumbar spine pain. Increased flexibility. Enhanced muscular performance. Improved gait and balance.

- PRACTICE BENEFITS -

Value-added reimbursable clinical procedure. Increased scope of practice and revenue opportunities. Competitive edge to attract new patients and generate referrals. Improved standard of care and patient outcomes. Time efficient rehabilitation and recovery. Minimal space utilization. Lessens physical demands on health professionals.
