

WAVE[®] PROelite
WHOLE-BODY ADVANCED VIBRATION THERAPY

**AN HOUR OF
THERAPY
IN 15 MINUTES**

**MOVE YOUR PATIENTS
AND YOUR PRACTICE IN THE RIGHT DIRECTION.**

WAVE is unique. It was created by a group of chiropractors and physical therapists to help their patients achieve the therapeutic results of vibration-assisted exercise – but with less stress and friction on joints, ligaments and tendons than with existing vibration devices. They set out to refine the best technology on the market.

WAVE's Vertical Controlled Vibration (VCV) – smooth, high-frequency vibrations – eliminates the lateral “shake, rattle and roll” of alternative machines.

Patented Air Wave Technology (AWT) automatically adjusts vibration forces to each patient's weight, size and fitness level – from fragile geriatric to performance athlete. This allows the clinician to provide an exercise solution to a larger population base, thereby expanding practice opportunities.

Find out how to help your patients – and your bottom line – by putting the unique advantage of WAVE to work for you.
