

**It makes  
strong bodies  
stronger,  
and rebuilds  
injured ones  
faster.**

**AN HOUR OF RESULTS  
IN 15 MINUTES**

WAVE Whole-Body Advanced Vibration Exercise units use patented Vertical Controlled Vibration (VCV): high-frequency vibrations that make **muscles contract and relax 20 to 50 times per second**, multiplying the effect of every move users make. And WAVE does it safely because only WAVE produces *smooth* vibrations, not the joint-jarring “shake, rattle and roll” of alternative machines.

Also, WAVE’s unique Air Wave Technology (AWT) automatically adjusts vibration levels to the precise weight and conditioning needs of individual users. And with all-steel construction, WAVE is tough, able to withstand years of continuous use.

Add an intelligent interactive touch-screen interface – plus Amber, our virtual personal trainer – and users will get a workout like they’ve never had before.
