2 years

**Age-friendly product line or service:**

Whole-Body Advanced Vibration Exercise (WAVE) provides a gentle, low-impact alternative to conventional exercise in a fraction of the time. It's an ideal solution for elders who are unable to engage in other forms of exercise.

**Age-friendly features:**

Our patented (#7,438,696) calibration system ensures consistent vibration effects that minimize discomfort and leads to greater compliance with exercise. A large exercise surface area and ergonomic handles ensure comfort and stability.

**Ongoing marketing & educational support:**

Training video. Ongoing website training. User manuals. Help desk for training advice. Brochures. Protocol development.

**In-service training:**

In-service training is available. Please call for information.

**What inspired your company to produce age-friendly products or services?**

The additional benefits associated with vibration training make this form of exercise ideal for older-adult populations. These benefits include increase in blood flow and positive effects on flexibility, balance and bone density.

**What inspired your founder(s) to form your company?**

With our practical experience in vibration training for older adults, we realized a need for a product that ensures comfort and stability, while exceeding the expectations of health professionals and trainers.

**What sets your company apart from others in the industry?**

Our patented calibration system ensures quality, durability and reliability in a commercial setting. Our attention to the customer and quick response to feedback. And our continuous investment in research and development.
