

SOMETHING UNEXPECTED HAPPENED WHEN DR. CRAIG SCHISLER ADDED VIBRATION THERAPY TO HIS PRACTICE

Although excited about using Bio-mechanical Muscle Stimulation (BMS) to shorten the rehabilitation process, Dr. Craig Schisler had also created a new source of revenue for his center. After completing treatment, his patients now book time on the WAVE to strengthen and enhance their vitality and maintain mobility gains.

The reason for this is WAVE's leading-edge vibration technology. Specifically designed by clinicians for clinical use, it is not only safe but, at almost 100% vertical, offers the world's purest vibrations. To find out how easy it is to gain a new modality and new revenue potential, contact the WAVE today.
